Subject: San Jacinto River Waste Pits Surface Water Sampling Plan

David,

The U.S. Environmental Protection Agency (EPA) has completed its review and approves the above referenced surface water sampling and analysis plan dated March 17, 2016, with the following modification:

1. Flow and tidal conditions during sampling may impact the results. As a result, all samples shall be collected during a falling or outgoing tide.

As we discussed, the field work for surface water sample collection will begin no later than the week of April 18, 2016. We will followup-up this email with a letter. Please let me know if you have any questions on this.

Regards,

Gary Miller
